

GARDEN NOTES
MAYO MAISON
11 KURUNDI PLACE, HAWKER

HISTORY

Our garden is in suburban Hawker on quite a large block. (2200m) we bought the block of land in 1974 and has “evolved” since then.

Initially as was fashionable at the time to have a native garden with some vegies and plenty of lawns for young children to play. We have both always loved gardens. This was passed on through our parents.

The garden means a lot to us - colour, different leaves, smells and plenty of bird life.

We grow a variety of plants, succulents, veggies, cuttings, and seed raising.

Our garden is continually evolving. We now have a mix of many plants -Dogwood, crabapples, crepe myrtles, maples, rose perennials (salvias) rondos, azaleas, hydrangea, hellebores, succulents, and many bulbs.

Spring is spectacular in our garden.

Because of the size of our garden, it is basically in (rooms). This makes it easier to manage, with lots of seclude areas - courtyard, back deck area and picking garden and veggie plot.

Composting is a priority for us. This helps with maintaining a rich well drained soil.

A lot of our (limited) knowledge has come through visiting our local nurserymen, visiting ‘Open Gardens’, reading, and joining the Horticultural Society.

We both hope you enjoy your visit to our garden and pick up some ideas.

Thanks very much for coming.

GARDEN OWNERS

Jill & Graeme Mayo.
